

REMARKS:

We offer seven amendments to the Specification, and we amend one claim.

The first amendment to the Specification is made to correct an error. The number of the previous figure was omitted in the original application, and it is now added. The fourth amendment is added to correct an error, since the motion described would actually be a rearward and downward rotation. The other five amendments are added for purpose of clarification. No new matter is entered by any of the amendments offered.

Claim 25 is amended to change the form, so it cannot be considered a multiple dependent claim. The potential dependency on Claim 5 is removed and replaced with description of structure that is actually recited in Claim 4, the claim on which Claim 5 depends. Again, there is no new matter entered.

Under the Paperwork Reduction Act of 1995, no persons are required to respond to a collection of information unless it contains a valid OMB control number.
